

(If I Had a) Starship
Owen Danoff

If I had a starship, like the ones in the movie scenes
I'd ditch this apartment like a long unpleasant dream
I'd leave my key in the door, dirty clothes all over the floor
I'd let the faucet drip, if I had a starship

If I saw the sunrise from the surface of Mars
And the dirty old Earth was lost out in a sea of stars
I would finally see a brand new day in front of me
Right at my fingertips, if I had a starship

Well, I ain't made for day jobs and drawn out nights like these
If I could get a new perspective, it might put my heart at ease

If I was in free fall, both my feet off the ground
And every thought, every word, every newborn wasn't weighing me down
I'd be able to breathe again, I won't be sharing no oxygen
With all the lying lips, if I had a starship

I'm burning up from friction, I'm crushed by gravity
You might call it science fiction, but listen, it's my biography

If I had a starship, like a hero up in the sky
I could soar like a falcon and shine like a firefly
I'd pass by the whole wide world, not the other way around
Through its hands I'd slip, if I had a starship
I'd take a one-way trip
If I had a starship
